

To Dale, Mike, John, Lauren, Christie and everyone else at CMI:

I just want to say I was very impressed with the entire process of purchasing and installation of my solar system from CMI.

The sales presentation was very straight forward and honest. The salesperson was very knowledgeable and answered any questions I had. I felt many other companies I had looked at were not nearly as straight forward about everything as you were.

The installation went great. The crew were very conscious about not leaving any mess behind. The installation was very clean and professional. My installation was on one of the hottest days of the year and still the guys preferred to crawl through the attic to access some hard to reach areas rather than using my attic access and potentially leaving some dirt in the house.

The office did an excellent job of handling all the paperwork, permits and contracts. There is a lot that goes on behind the whole solar thing and it was great to have someone who could take care of all those details.

All in all I am very satisfied with my installation. It is performing perfectly and just as designed. CMI conducts itself at the peak of professionalism which is something hard to find these days. I commend you and all your staff on doing such a great job and would not hesitate to recommend you to anyone.

Thanks!

B.T.
